

Business Brokers Can Now Earn A Powerfully Profitable, Steady Second Income Stream To Greatly Increase Clientele and Profits

By Brian Strugs

Business brokers are constantly in the middle of the buying and selling of businesses. Therefore, they are also in a unique and potentially profitable position to multiply their profits. How? By earning individualized referral fees for referring their past, present, and future clients who are sellers of businesses to Profit Increase Funding, Inc. Once that is done, a certified funding company, such as, Profit Increase Funding, can purchase business notes that are created by the referred sellers whenever they sell their business utilizing Seller Financing. It is a fact that 85 percent of businesses sold in the U.S. use Seller Financing, which translates into numerous business brokers that can refer clients to Profit Increase Funding, and therefore, generate an enormous amount of steady, secondary income.

Once your clients/business sellers (past, present or future) are referred to us, we can provide them with a lump sum of debt-free cash by purchasing the monthly incremented payments they are already receiving from the buyer for up to 95 percent of the face value of the Business Note, and minus a small fee. One of our funding sources will then begin to take over the burden and responsibility of collecting the monthly payments from the buyer who purchased the business. Hence, this relieves the seller from the burden and responsibility of having to collect the slow and depreciating monthly payments from the buyer while they simultaneously enjoy the beauty, freedom, and tranquility of receiving a debt-free lump sum of cash for up to 95 percent of the face value, and minus a small fee. When the transaction has been successfully completed, your business brokerage will earn a generous referral fee from Profit Increase Funding. This process will repeat itself, as will your referral fee for successfully completed transactions for each business that you refer to Profit Increase Funding.

By perpetually collaborating with our business in this manner, this will allow your business brokerage to generate more goodwill toward your clients. Your company can even wisely and profitably decide to dramatically increase your profits by choosing to advertise and market this special, unique, and powerful benefit to your customers on radio, television or newspapers. By doing so, news of this will rapidly and greatly spread to your clientele and throughout the community, therefore, making your business become much more sought after.

Profit Increase Funding has over 150 funding source companies (Factors) with billions of dollars to invest. If you would like to obtain a free, no obligation consultation, contact them by email, telephone or visit the website as follows:
